Real groups
AI agents, nothing assigned
AI agents, specialty assigned
Shuffled baseline (95th pct.)
A A hub that was a name tag
gpt-4.1-mini, identical agents: persistence in who receives messages (6 runs)
Fixed names
agent "A1" is the top receiver in 6 of 6 runs
Labels shuffled
reruns, colleagues under per-viewer labels
B Coordination without a division of labor
persistence in which type of task an agent takes
Identical agents, Haiku 4.5
labels shuffled; 3 runs
Identical agents, gpt-4.1-mini
labels shuffled; 3 runs
Told a specialty, Haiku 4.5
2 runs
Told a specialty, gpt-4.1-mini
2 runs
C Real groups clear their own baselines
persistence in each group's recorded behavior
Clonal ants, no queen
time near nestmates
Ants with a queen
interactions (first look)
Online game players
carry vs support role
Honey bees
food exchanges (first look)
Office workers, two sites
face-to-face contacts
